Agent Orchestration for Multi-Vendor Agents

One door in front of every agent and one gate in front of every consequential action, provided by an orchestration layer that sits in the customer's own tenant, above the agents their vendors ship.

CASE STUDY · OCTOBER 2026

WHO IT IS FOR

Enterprises where every platform in the estate is shipping its own copilot.

WHAT IT COSTS THEM TODAY

.

WHERE IT STANDS

Running in production today.

What to say in the room

- Every vendor ships an agent, and nobody orchestrates them.
- Left alone, they end up renting the orchestration layer from their vendors.
- The next agent becomes an incremental addition rather than another program.

What it is built on

- Azure AI Foundry
- Functions / Container Apps
- Entra ID
- Key Vault
- Teams

PROOF · IN PRODUCTION

8-hospital system.
